Pittsburgh Plate Glass Company

TO THE TRADE

In submitting herewith our illustrated latest catalog **M** of **Mirrors in Frames**, we show many new and latest designs. We ask your careful inspection.

We use the Celebrated "Durand Process" of Silvering

THIS is the original patent back. Our stock of Plate Glass is most carefully selected, our beveling is accurate and true. We claim to have the best facilities and the most complete system of any manufacturer of these goods in the country. Our facilities for supplying Plate Glass Mirrors, and of any size, will be understood when we state that we have 5 glass factories, extending from Pennsylvania to Missouri; and mirror plants located as follows: New York, Boston, Philadelphia, Buffalo, Cincinnati, Chicago, St. Louis, Minneapolis, Atlanta, Davenport and Des Moines, Iowa, Omaha, Crystal City, Mo., Ford City, Pa., High Point, N. C., Kansas City, Mo., Newark, N. J., Dallas and Houston, Texas, Salamanaca, N. Y.

Very Respectfully,

Pittsburgh Plate Glass Co.

TERMS

Sixty days net; 2 per cent Ten days

THESE prices, on separate sheet, we desire to state, owing to the unsettled condition of the market, not only as to the value of material, but labor as well, we feel that only justice can be given you, as well as ourselves, by stating that the prices herein contained will be subject to change **Without Notice**.

Boxing Charges on Mirror Orders

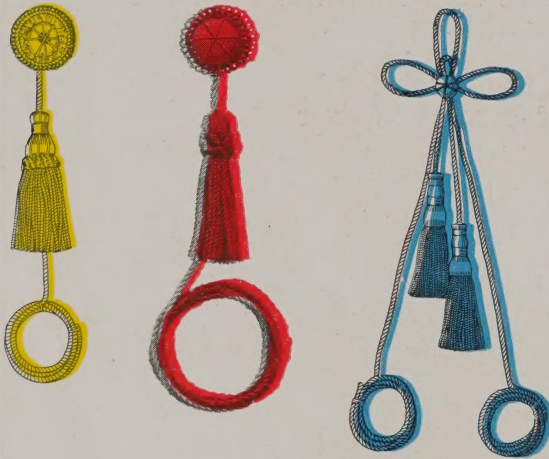

A BOXING CHARGE is made on all orders for mirrors. Our goods are packed securely by experienced packers and are shipped at risk of **Owner or Consignee**. We cannot be responsible for **Loss or Damage** after we take **Carrier's Receipt**. If goods arrive in **Bad Order**, give your **Receipt** accordingly and thereby have recourse on the Transportation Company.

NOTICE—This book supersedes all others and renders void all previous issues.

June, 1924.

LATEST IN DECORATIVE FRAMED MIRRORS

All new patterns of attractive design. Among the new popular and quick-selling frames are those with the polychrome finish. This effect is produced after the manner indicated by the name—with the use of many colors, such as blue, pink, and green artistically blended on a background of a dark stippled color. All high-lights finished in gold. Dealers will have a ready sale for the polychrome frames fitted with either the plain mirrors or the new mitred mirrors. See pages 4 to 32.

A distinctive departure is offered in the mitred mirrors, those with the deep "V" shape cutting, forming a simple and effective design on the face of the mirror. See pages 4 to 32.

Wire Filled, Silk Covered

Mirror Cords and Tassels

For choice selection of Silk Mirror
Cord and Tassels

See pages 31 and 32

Mantel or Buffet

Mitred Mirrors

There are a limited number of three panel mirrors, illustrated in this book, that are admirably adapted to use over mantel or buffet. See pages 25 to 30.

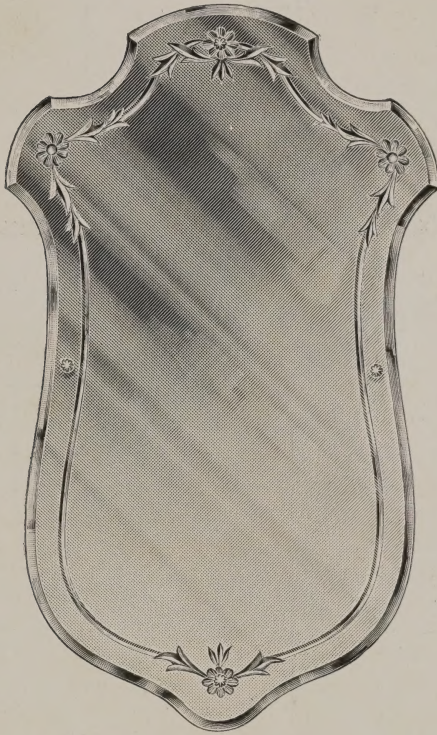

The skillful hanging of occasional mirrors, such as these, lends an air of spaciousness and depth of hallways or small rooms. They are so finely wrought in deep rich polychrome that their low pricing is the more remarkable.

All Glass

One Piece—Polished Plate

Venetian Mirror

Style J
Size 18x30

These mirrors are of the latest. Made in one piece of heavy Polished Plate Glass with beautiful wheel-cut floral decorations or designs. The highly polished plate glass and the perfect silvering bring out the great beauty and fine wheel-cutting and beveled edge. These decorations sparkle brilliantly. The mirror is firmly fastened to a strong wooden back or frame by means of glass headed screws and fitted with two strong nickel-plated hinges for hanging. For additional designs see pages 34, 35 and 36. Write our nearest warehouse for prices, etc.

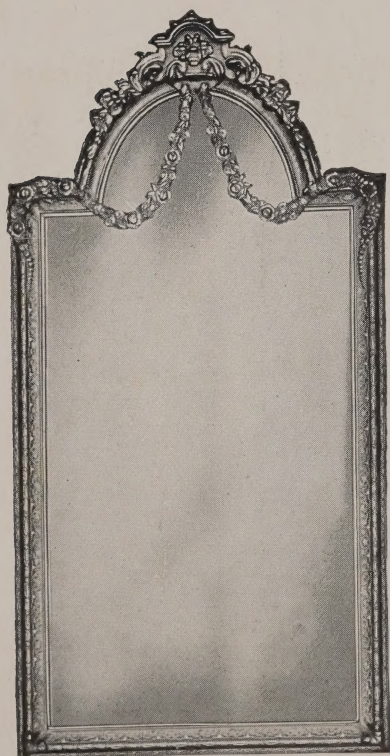

Pattern No. 436

Polychromed Mirrors

SPECIAL NOTICES

LOOK at pages 2 to 32 for new and varied assortment of dainty Ornamental Mirrors in oval and odd shapes. All are very handsome and chosen in individual artistic designs—rich Polychrome finishes.

By

Polychrome Finish

Is Meant

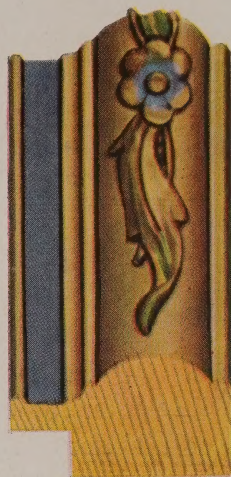

“A frame is finished in colors, just as the word designates, which word comes from the Greek word meaning ‘many colors.’ The background is finished in a stippled dark color, and the highlights or ornaments are finished in gold and assorted colors, such as Blue, Pink and Green, blended together.”

ALL STEEL

Toilet or Medicine Locker

The Latest and Best for the Home,
for Apartment Building, Hotels, Etc.

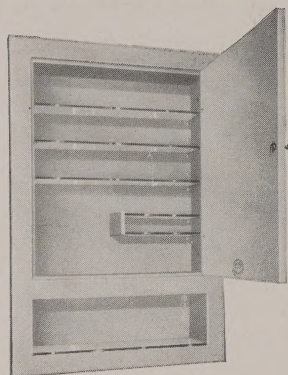

In These Cabinets

Smooth soft steel is used, formed into shape in mammoth presses, with corners welded and made seamless.

They are furnished in snow white varnish enamel, each coat baked separately in gas heated ovens, and this finish is guaranteed not to blister, crack nor peel (external violence excepted).

Hess Cabinets are clean, sanitary, everlasting and beautiful. Not expensive, but suitable for the finest bathroom.

They never warp, sag, nor split, are easily cleaned with soap and water, and keep their good looks indefinitely.

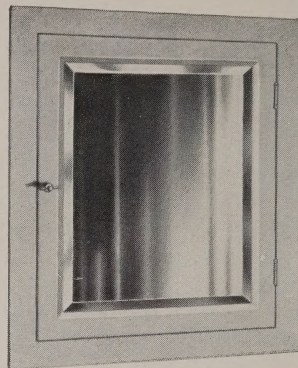

Style E, to Recess, open,
with plate glass shelves

The shelf arrangement provides two short shelves for tubes, flat boxes, etc., leaving a high compartment to accommodate tall bottles.

Hess Cabinets are made in three styles, and five sizes, to hang on the wall, or to recess.

Shipped in stout wooden boxes and safe arrival is guaranteed.

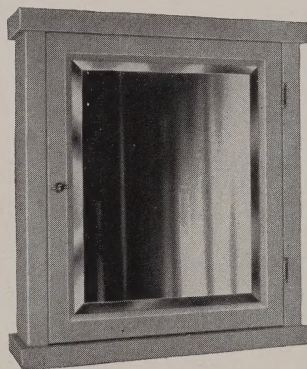

Style F, to Recess

Selected polished plate glass mirrors of the best grade are supplied, with plain or beveled edges.

The hinges and turn catch are of solid brass, heavily nickel plated and highly polished.

The shelves are of enameled steel, or of polished plate glass, as preferred, and are adjustable, resting upon removable round rods on which no dust can lodge. Recess Cabinets require wall openings $4\frac{1}{4}$ inches deep from face of plaster and project $1\frac{1}{4}$ inches.

Style H, to hang on wall
Does not recess

THE MAKING OF PLATE GLASS

We use only Polished Plate Glass in all our Fitted Framed Mirrors.

That some little idea may be gained of what it costs and the extreme care that must be used to produce Polished Plate Glass and Mirrors, we give below a few brief sketches of how Plate Glass is made.

Casting the Plate

This is a large table of iron, a heavy iron roller which covers the full width. The molten glass metal is poured upon the table from the melting pot, and the roller quickly passes over it, leaving a layer of uniform thickness of about $\frac{1}{2}$ inch. The red-hot plate is shoved into an annealing oven.

The plates remain for several days in the annealing oven, where the temperature is gradually reduced.

GRINDING AND POLISHING

The grinding table is a large flat revolving platform made of iron, twenty-five feet or more in diameter. The grinding table is prepared by being flooded with Plaster of Paris and water; then the glass is carefully lowered into place until it is set. The grinding is done by revolving runners. Sharp sand is fed upon the table, and the stream of water constantly flows over it. After the first cutting by the sand, emery is used in a similar manner.

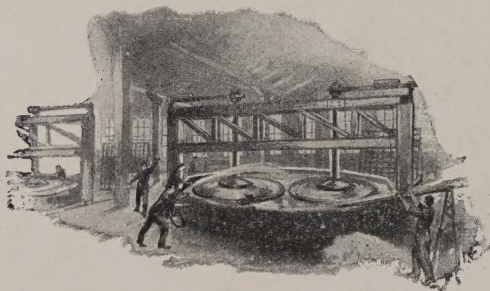

BEVELING

In the process of beveling, the plate passes through the hands of skilled workmen of five different divisions, namely: Roughers, emerers, smoothers, white-wheelers and buffers; and different abrasive materials are used in the order indicated by the titles. These materials are sand, emery, natural sandstone imported from England, pumice and rouge.

SILVERING

The plate, after leaving the beveling room, is again carefully examined for surface defects. These defects may consist of scratches caused inadvertently by permitting the surface of the plate to come into contact with the abrasive material. These scratches are removed by hand polishing, which must be skillfully done; otherwise the reflection will become distorted through over-polishing in a given area or spot. The plate is then taken to a wash table where

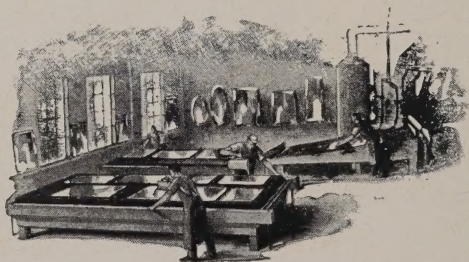

Grinding the Plate

Afterward comes the polishing, which is done on another special table. The polishing material is rouge, or iron peroxide, applied with water, and the rubbing is done by blocks of felt. Reciprocating machinery is so arranged that every part of the plate is brought underneath the rubbing surface.

The grinding and polishing has taken away from the original plate half of its thickness, sometimes more. There is no saving of the material; it has all been washed away.

In preparing plate glass for mirrors great care must be exercised in the selection of the plates. This selection bears reference not only to surface defects, but to the quality in general; defects which cannot ordinarily be seen are magnified many fold after the glass has received a covering of silver.

Silvering Mirror Plates

the surface to be silvered is thoroughly washed with distilled water; after which it is taken to a table that is covered with blankets, and which is heated to a temperature of from 90 to 110 degrees. The blanketing is to protect the plate from being scratched, and also to catch all of the silver waste. The silvering solution is nitrate of silver liquefied by a certain formula; and is poured over the plate; the fluid having the appearance which to the ordinary observer looks like nothing other than pure distilled water. Within a few minutes the silver, aided by a reactivity, added prior to pouring begins to precipitate upon the glass; the liquids remaining above and thus preventing air and impurities from coming into contact with the silver. Such contact would produce oxidation. After the silver is precipitated the plate is thoroughly dried, shellacked and painted; after which it is ready for commercial use.

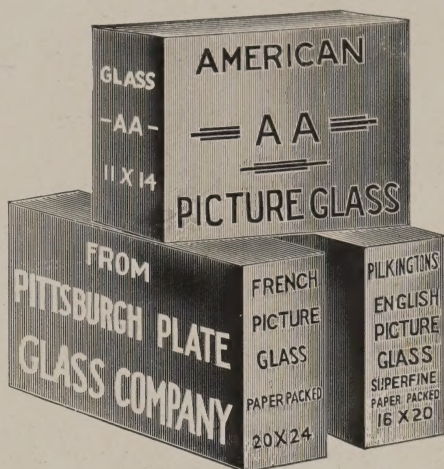

Special Select Picture Glass

Our facilities for handling your requirements of **Picture Glass** cannot be equalled in this country. We aim to carry a complete stock at each warehouse. (See second page of cover.)

All our Glass is especially selected for the framing trade. A few years ago we found it necessary to import our high grade Picture Glass, but it has been demonstrated beyond doubt that a much superior article can be made right here at home.

“American Picture Glass”

Window Glass

A large and well assorted stock of choice American brands is at your disposal at market rates.

Plate Glass Top for Office Desk

Plate Glass Top for Dressers

Plate Glass Top for Dining Room
Tables

Plate Glass for Ventilators

Plate Glass for Shoe Stands

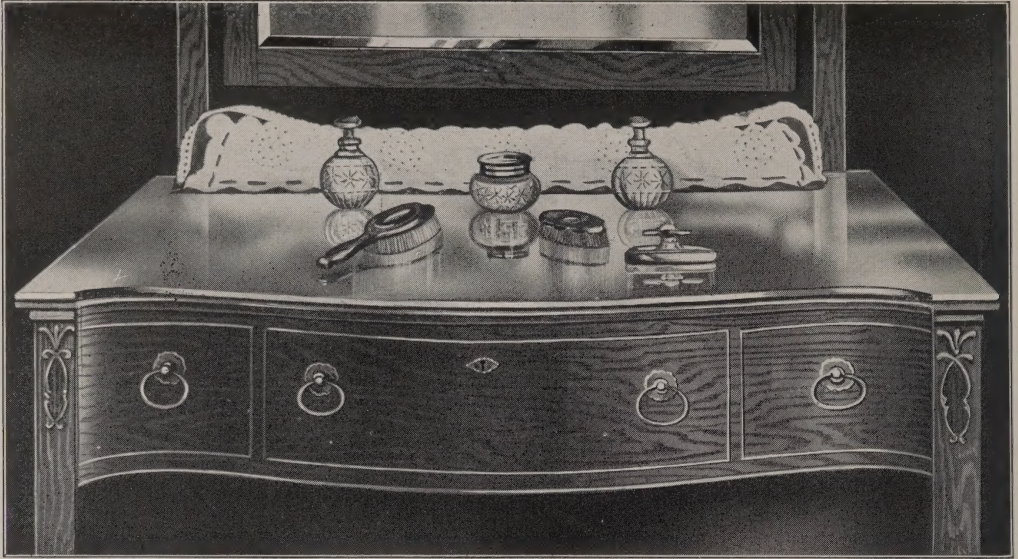

It protects the polished surface—which cannot be scratched by silver or china; nor stained by ink, perfume or liquids; nor charred by hair curlers, matches or cigars.

Not only is the wood completely safe-guarded, but its grain and finish are enhanced and enlarged.

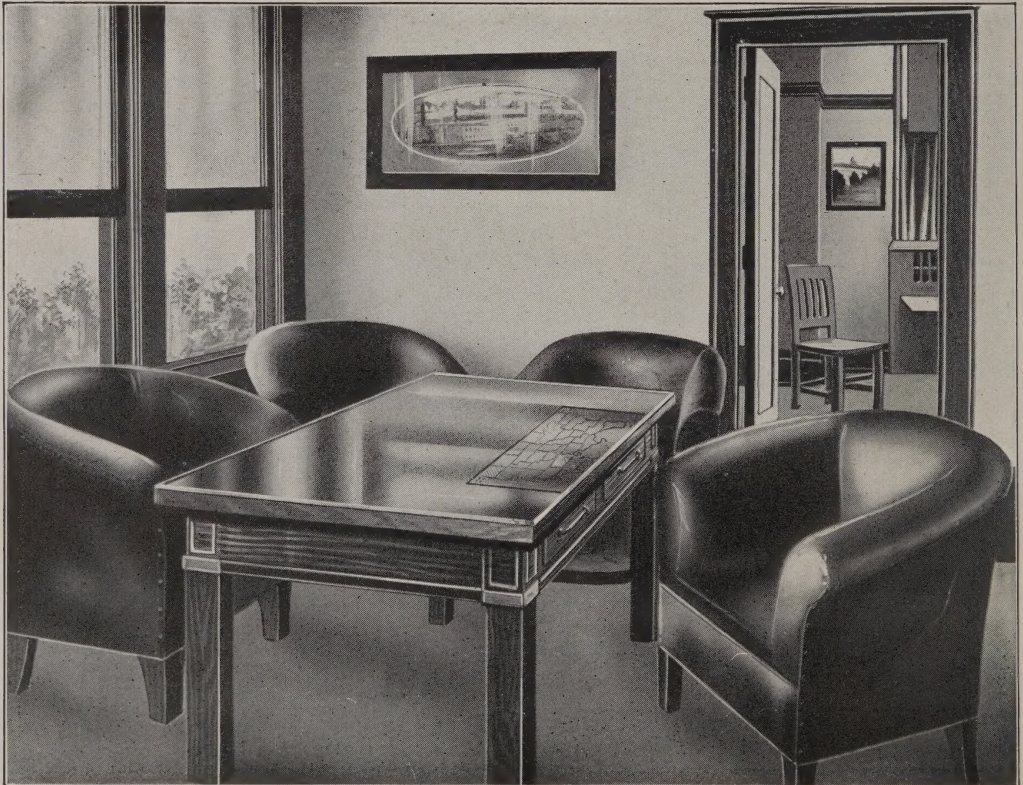

Delicate and elaborate scarfs and doilies can be placed underneath the glass, giving a most pleasing effect to the eye.

The glass is easily wiped clean. Being very thick plate, it is difficult to break; in fact, with ordinary care, it will last a lifetime.

Polished plate glass gives a rich appearance, lends graceful lines, and adds a tone of distinction to the furniture.

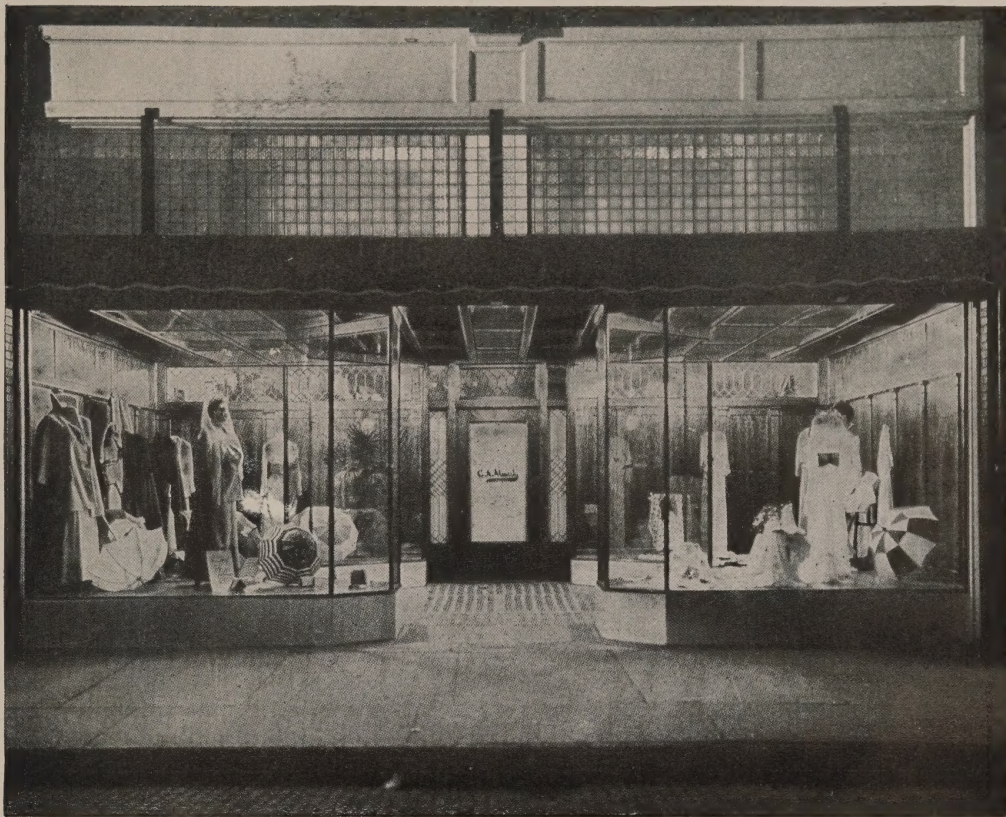

No highly polished or even dull finished furniture top should be left to the ravages of time or careless treatment—it is so easy to order a beautiful plate glass cover—cut to fit every angle and turn—with beveled or ground and polished edges. It adds to the beauty and life of one's furniture.

16x20	15½x19½	25 lbs.

Milk-White Carrara Glass

A Milk-White Glass, homogeneous and opaque, with brilliant natural polish, annealed surface, non-porous and non-staining, impervious to acid or alkali, sanitary and therefore used extensively for bathrooms, counters and table tops. Hone Finish or Polished.

Sizes and Thicknesses

Manufactured in sheets as large as 60" wide and as long as 110" of various thicknesses: ½", ¾", 1" 1¼".

Can be treated, ground, beveled, chamfered, drilled and cut as readily as marble and possesses qualities far superior.

Uses

The non-absorbing, sanitary quality of the material, its cleanliness, durability and beauty make it particularly adaptable for structural

purposes, such as wainscotings, wall-coverings, store front bulkheads, bathrooms and showers, lavatories, hospitals, surgical operating rooms, barber shops, soda fountains, high class restaurants, for table tops, etc. Also for counter tops and tables, window display plates, shelves, refrigerators, sinks and drains, medicine cabinets, kick-plates, etc.

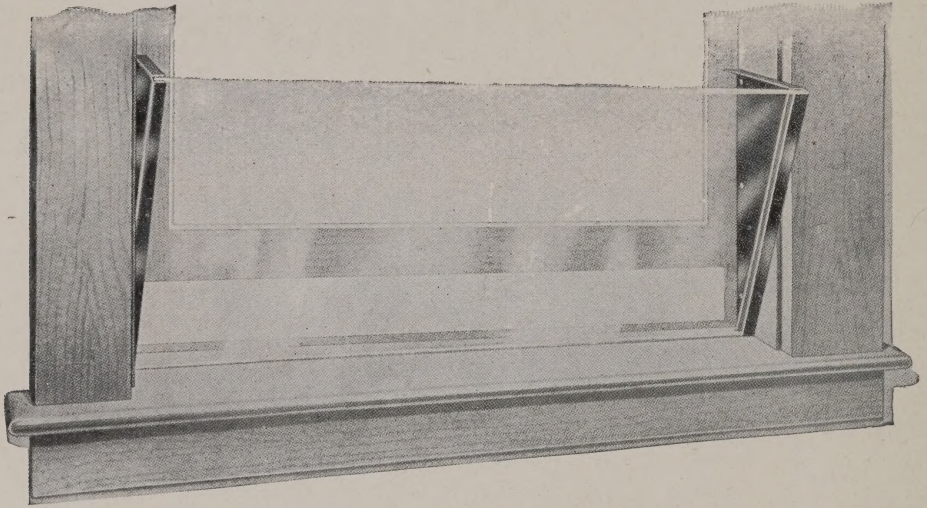

Black Glass

A product of pure black, uniform color, made in sizes and thicknesses corresponding to the white glass described above. Polished or hone finished. Its uses and qualities are the same as the white glass.

Also used extensively, in the honed or velvet finish, in combination with white in structural work—and for deal-plates, table tops, etc.

The "Practical" Window Ventilator

has been devised to meet the demand for a Window Ventilator; simple of construction, easily installed, of neat appearance, durable and dependable, and capable of supplying at all times and under varying weather conditions the amount of fresh air desired without causing drafts or extreme variations of temperature in the room. This Ventilator consists of three parts. Two neat metal brackets and a sheet of Polished Plate Glass about 12 inches high and extending the full width of the window.

Can be readily removed and replaced without unscrewing brackets

Prevents rain, snow and dust from driving into room through open windows.

Prevents drafts and gives perfect distribution of fresh air at all times.

Is suitable for all seasons and weather conditions.

Does not obstruct the view.

Does not deface window casings.

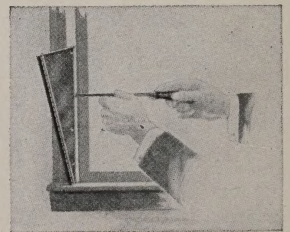

Is neat, strong, compact and improves appearance of room.

Is reasonable in price.

Does not require mechanical ability to install.

Fills a recognized necessity.

Is superior to other ventilators on the market.

These brackets are attached on either side of the window frame with small screws and can be put in place in a few minutes by anyone.

To obtain the size of the glass required take the distance between the window frames, or casing, and subtract $\frac{3}{8}$ of an inch to allow for brackets.

PITTSBURGH *Proof* PRODUCTS

FOR THE FURNITURE REPAIR SHOP—

WHETHER you wish to “touch up” a picture frame, or refinish an entire suite of furniture, you can secure the necessary materials from the Pittsburgh Plate Glass Co.

The line of Pittsburgh Proof Products is made up of a complete, well assorted stock of Paints, Varnishes, Wood Stain and Enamels for every purpose and finish, to be sold or used in Furniture Stores or Repair Departments.

These materials are reliable; they have been tested by time and service in furniture repair shops, as well as by Furniture Manufacturers.

Our nearest warehouse will forward any of these supplies with Glass or Framed Mirror shipments.
